JOURNAL OF THERMOPHYSICS AND HEAT TRANSFER
Vol. 11, No. 4, October–December 1997

1997 *Journal of Thermophysics and Heat Transfer* Index

How to Use the Index

In the Subject Index, pages 600–603, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 604, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 605–608, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1997, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Simulation

Evaluation of Real-Gas Phenomena in High-Enthalpy Impulse Test Facilities: A Review T97-001

Energy

Conservation

Optimal Insulation of Structures with Varying Thermal Conductivity T97-022
Influence of Buoyancy on Convective Heat Transfer in Helicoidal Pipes T97-028

Magnetohydrodynamic Power Generation

Viscous Flow of Plasmas on Nonequilibrium Thermodynamic Diagrams T97-040
Monitoring Magnetohydrodynamics Boundary Layers Using Emission Line Shape Features T97-054

Rotating Machinery

Turbulent Flow and Heat Transfer in Rotating Different Aspect Ratio Channels T97-048

Fluid Dynamics

Boundary Layers and Heat Transfer—Laminar

Laminar Film Condensation on a Thin Finite Thickness Plate T97-015
Influence of Buoyancy on Convective Heat Transfer in Helicoidal Pipes T97-028
Hydromagnetic Free Convection Flow Over an Inclined Plate Caused by Solar Radiation T97-046
Superheated Laminar Film Condensation on a Nonisothermal Horizontal Tube T97-080

Boundary Layers and Heat Transfer—Turbulent

Monitoring Magnetohydrodynamics Boundary Layers Using Emission Line Shape Features T97-054

Computational Fluid Dynamics

Full Viscous Modeling in Generalized Coordinates of Heat Conducting Flows in Rotating Systems T96-091
Vibrationally Relaxing Flow of N_2 past an Infinite Cylinder T97-003
Numerical Simulation of Supersonic, Chemically Reacting Flow Using an Implicit Finite Volume Method T97-005
Novel Approach for Calculating Equilibrium Radiating Flows T97-006
Electromagnetic Attenuation in Plasmas Generated by Atmospheric Flight T97-043
Nonequilibrium and Differential Diffusion Effects in Turbulent Hydrogen Diffusion Flames T97-057
Numerical Simulation of Bhatnagar–Gross–Krook—Burnett Equations for Hypersonic Flows T97-058
Heat Transfer and Flowfields in Short Microchannels Using Direct Simulation Monte Carlo T97-075

Hydrodynamics

Influence of Buoyancy on Convective Heat Transfer in Helicoidal Pipes T97-028

Hypersonic Flow

Evaluation of Real-Gas Phenomena in High-Enthalpy Impulse Test Facilities: A Review T97-001
Numerical Investigation of Vibrational Nonequilibrium Effects in Hydrogen–Oxygen Rocket Engines T97-002
Vibrationally Relaxing Flow of N_2 past an Infinite Cylinder T97-003
Different Levels of Modeling for Diffusion Phenomena in Neutral and Ionized Mixtures T97-004
Novel Approach for Calculating Equilibrium Radiating Flows T97-006
Effect of H_2O Vapor on the Vibrational Relaxation in Hypersonic Wind Tunnels T97-038
Influence of Non-Boltzmann Distributions on the Thermodynamics Properties of Gaseous Species T97-039
Effects of Flowfield Nonequilibrium on Convective Heat Transfer to a Blunt Body T97-041
Comparison of Grid-Definition Schemes for Monte Carlo Simulations T97-042
Electromagnetic Attenuation in Plasmas Generated by Atmospheric Flight T97-043
Survey of Blunt Body Flows Including Wakes at Hypersonic Low-Density Conditions T97-049
Evaluation of Real-Gas Phenomena in High-Enthalpy Aerothermal Test Facilities: A Review T97-050
Modeling of Catalytic Reactions on Silica Surfaces with Consideration of Slip Effects T97-052
Numerical Simulation of Bhatnagar–Gross–Krook—Burnett Equations for Hypersonic Flows T97-058
Assessment of Thermochemical Nonequilibrium and Slip Effects for Orbital Re-Entry Experiment T97-085
State-to-State Approach in the Kinetics of Air Components Under Re-Entry Conditions T97-086

Inlet, Nozzle, Diffuser, and Channel Flows

Effect of H_2O Vapor on the Vibrational Relaxation in Hypersonic Wind Tunnels T97-038
Characterization of Plenum Spectra in an Arcjet Wind Tunnel T97-051
Instability and Heat Transfer in Grooved Channel Flow T97-064

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Survey of Blunt Body Flows Including Wakes at Hypersonic Low-Density Conditions T97-049

Multiphase Flows

Post-Critical Heat Flux Swirl Flow Heat Transfer with Two Refrigerants and Water T97-027
Rarefaction Effects in Small Particle Combustion T97-033

Plasmadynamics and MHD

Different Levels of Modeling for Diffusion Phenomena in Neutral and Ionized Mixtures T97-004
Magnetic Damping of Buoyant Convection During Semiconductor Crystal Growth with *g*-Jitters T97-030
Viscous Flow of Plasmas on Nonequilibrium Thermodynamic Diagrams T97-040
Electromagnetic Attenuation in Plasmas Generated by Atmospheric Flight T97-043
Hydromagnetic Free Convection Flow Over an Inclined Plate Caused by Solar Radiation T97-046
Modeling of the Electrogun Metal Vapor Plasma Discharge T97-053
Monitoring Magnetohydrodynamics Boundary Layers Using Emission Line Shape Features T97-054
Magnetic Damping of Axisymmetric Thermocapillary Convection in Float Zones in Microgravity T97-090

Rarefied Flows

Numerical Investigation of Vibrational Nonequilibrium Effects in Hydrogen–Oxygen Rocket Engines T97-002
Rarefaction Effects in Small Particle Combustion T97-033
Comparison of Grid-Definition Schemes for Monte Carlo Simulations T97-042
Survey of Blunt Body Flows Including Wakes at Hypersonic Low-Density Conditions T97-049
Modeling of Catalytic Reactions on Silica Surfaces with Consideration of Slip Effects T97-052
Heat Transfer and Flowfields in Short Microchannels Using Direct Simulation Monte Carlo T97-075
Computations of High-Speed, High Knudsen Number Microchannel Flows T97-076
Assessment of Thermochemical Nonequilibrium and Slip Effects for Orbital Re-Entry Experiment T97-085

Reacting Flows and Combustion

Different Levels of Modeling for Diffusion Phenomena in Neutral and Ionized Mixtures T97-004
Numerical Simulation of Supersonic, Chemically Reacting Flow Using an Implicit Finite Volume Method T97-005
Novel Approach for Calculating Equilibrium Radiating Flows T97-006
Rarefaction Effects in Small Particle Combustion T97-033
Convective and Radiative Coupling in a Burner-Supported Diffusion Flame T97-034
Nonequilibrium and Differential Diffusion Effects in Turbulent Hydrogen Diffusion Flames T97-057
State-to-State Approach in the Kinetics of Air Components Under Re-Entry Conditions T97-086

Separated Flows

Turbulent Heat Transfer and Fluid Flow in a Porous-Baffled Channel T97-063

Shock Waves and Detonations

Existence of the Bottleneck in Vibrational Relaxation of Diatomic Molecules **T97-037**
Numerical Simulation of Bhatnagar–Gross–Krook—Burnett Equations for Hypersonic Flows **T97-058**

Supersonic Flow

Numerical Simulation of Supersonic, Chemically Reacting Flow Using an Implicit Finite Volume Method **T97-005**
Experimental Studies of Supersonic Film Cooling with Shock Wave Interaction (II) **T97-091**

Unsteady Flows

Numerical Simulation of Secondary Flows in Channels Driven by Applied Lorentz Forces **T97-065**

Viscous Non-Boundary-Layer Flows

Oscillatory Thermocapillary Flow in Cylindrical Columns of High Prandtl Number Fluids **T97-013**
Numerical Simulation of Secondary Flows in Channels Driven by Applied Lorentz Forces **T97-065**

Interdisciplinary Topics

Lasers and Laser Applications

Correlation Transfer: Index of Refraction and Anisotropy Effects **T97-059**

Launch Vehicle and Missile (LV/M) Technology

Thermal Protection Systems

Coupled Thermal Analysis Method with Application to Metallic Thermal Protection Panels **T97-025**

Propulsion

Airbreathing Propulsion

Full Viscous Modeling in Generalized Coordinates of Heat Conducting Flows in Rotating Systems **T96-091**

Combustion and Combustor Designs

Convective and Radiative Coupling in a Burner-Supported Diffusion Flame **T97-034**

Ramjets and Scramjets

Radiative Heating in Scramjet Combustors **T97-007**

Space Technology

Space Experiments

Pool Boiling Curve in Microgravity **T97-031**

Space Processing

Magnetic Damping of Buoyant Convection During Semiconductor Crystal Growth with *g*-Jitters **T97-030**
Magnetic Damping of Axisymmetric Thermocapillary Convection in Float Zones in Microgravity **T97-090**

Spacecraft Contamination/Sterilization

Contamination Effects on the Geostationary Operational Environmental Satellite Instrument Thermal Control System **T97-068**

Spacecraft Thermal Management

Modeling of Room-Temperature Heat Pipe Startup from the Frozen State **T97-024**
Heat Transport Enhancement of Monogroove Heat Pipe with Electrohydrodynamic Pumping **T97-066**
Contamination Effects on the Geostationary Operational Environmental Satellite Instrument Thermal Control System **T97-068**

Thermophysics and Heat Transfer

Ablation, Pyrolysis, Thermal Decomposition, and Degradation

Modeling of the Electrogun Metal Vapor Plasma Discharge **T97-053**

Aerothermodynamics/Thermal Protection

Evaluation of Real-Gas Phenomena in High-Enthalpy Impulse Test Facilities: A Review **T97-001**
Radiative Heating in Scramjet Combustors **T97-007**
Aerodynamic Trapping and Laser Heating for Containerless Glass Processing in Microgravity **T97-014**
Coupled Thermal Analysis Method with Application to Metallic Thermal Protection Panels **T97-025**
Influence of Non-Boltzmann Distributions on the Thermodynamics Properties of Gaseous Species **T97-039**
Effects of Flowfield Nonequilibrium on Convective Heat Transfer to a Blunt Body **T97-041**
Green's Function to Determine Temperature Distribution in a Semitransparent Thermal Barrier Coating **T97-047**
Evaluation of Real-Gas Phenomena in High-Enthalpy Aerothermal Test Facilities: A Review **T97-050**
Infrared Imaging and Shock Visualization of Flow over Concave Blunt Bodies **T97-056**
Temperature Distribution in a Composite of Opaque and Semitransparent Spectral Layers **T97-081**
Experimental Studies of Supersonic Film Cooling with Shock Wave Interaction (II) **T97-091**

Boiling/Condensation

Temperature Variation and Heat Transfer in Triangular Grooves with an Evaporating Film **T97-011**
Laminar Film Condensation on a Thin Finite Thickness Plate **T97-015**
Post-Critical Heat Flux Swirl Flow Heat Transfer with Two Refrigerants and Water **T97-027**
Pool Boiling Curve in Microgravity **T97-031**
Quasi-Steady-State Performance of a Heat Pipe Subjected to Transient Acceleration Loadings **T97-044**
Steady-State Performance of a Rotating Miniature Heat Pipe **T97-078**
Superheated Laminar Film Condensation on a Nonisothermal Horizontal Tube **T97-080**
Visualization Study of Flooding and Entrainment in a Closed Two-Phase Thermosyphon **T97-087**

Computational Heat Transfer

Full Viscous Modeling in Generalized Coordinates of Heat Conducting Flows in Rotating Systems **T96-091**
Mixed Convection in the Laminar Flow of Viscoelastic Liquids Through Rectangular Ducts **T97-012**
Coupled Thermal Analysis Method with Application to Metallic Thermal Protection Panels **T97-025**
Transient Natural Convection Between Vertical Finite Length Heated Plates **T97-029**
Analysis of Radiative Transfer in Cylindrical Enclosures Using the Finite Volume Method **T97-035**
Analysis of Discrete Ordinates Method with Even Parity Formulation **T97-036**
Effects of Flowfield Nonequilibrium on Convective Heat Transfer to a Blunt Body **T97-041**
Double-Diffusive Convection in a Porous Trapezoidal Enclosure with Oblique Principal Axes **T97-045**
Turbulent Flow and Heat Transfer in Rotating Different Aspect Ratio Channels **T97-048**
Laminar Pulsed Forced and Mixed Convection in a Vertical Isothermal Tube **T97-062**
Instability and Heat Transfer in Grooved Channel Flow **T97-064**
Symbolic Computation to Estimate Two-Sided Boundary Conditions in Two-Dimensional Conduction Problems **T97-069**
Heat Transfer and Flowfields in Short Microchannels Using Direct Simulation Monte Carlo **T97-075**
Bounded, High-Resolution Differencing Schemes Applied to the Discrete Ordinates Method **T97-082**
Discrete Ordinates Algorithm for Domains with Embedded Boundaries **T97-083**
View Factors for Rectangular Enclosures Using the Direct Discrete-Ordinates Method **T97-092**
Transient Natural Convection in a Cylindrical Annulus **T97-093**

Cryogenics

Measurement of Small Concentrations of Gas in a Low-Pressure Water Vapor Mixture **T97-088**

Electronics Cooling

Thermal Contact Conductance of Adhesives for Microelectronic Systems **T97-020**
Experimental Thermal Contact Conductance of Electronic Modules **T97-021**
Experiments and Analyses of Flat Miniature Heat Pipes **T97-023**
Experimental and Approximate Analytical Modeling of Forced Convection from Isothermal Spheres **T97-032**
Instability and Heat Transfer in Grooved Channel Flow **T97-064**
Visualization Study of Flooding and Entrainment in a Closed Two-Phase Thermosyphon **T97-087**
View Factors for Rectangular Enclosures Using the Direct Discrete-Ordinates Method **T97-092**

Forced Convection

Turbulent Flow and Heat Transfer in Rotating Different Aspect Ratio Channels **T97-048**

Turbulent Heat Transfer and Fluid Flow in a Porous-Baffled Channel T97-063
Effect of Ribs with Holes on Heat Transfer in a Square Channel T97-073
Heat Transfer and Friction in Segmental Turbine Blade Cooling Channels T97-074

Heat Conduction

Thermal Contact Conductance of Composite Cylinders T97-009
Analysis of Non-Fourier Conduction Waves from a Reciprocating Heat Source T97-010
Laminar Film Condensation on a Thin Finite Thickness Plate T97-015
Thermal Property of a Two-Dimensional Partially Conducting Thin Screen T97-017
Review of Models for Thermal Contact Conductance of Metals T97-019
Experimental Thermal Contact Conductance of Electronic Modules T97-021
Optimal Insulation of Structures with Varying Thermal Conductivity T97-022
Steady-State Heat Transfer Analysis of Arbitrarily Coiled Buried Pipes T97-026

Heat Pipes

Temperature Variation and Heat Transfer in Triangular Grooves with an Evaporating Film T97-011
Experiments and Analyses of Flat Miniature Heat Pipes T97-023
Modeling of Room-Temperature Heat Pipe Startup from the Frozen State T97-024
Quasi-Steady-State Performance of a Heat Pipe Subjected to Transient Acceleration Loadings T97-044
Heat Transport Enhancement of Monogroove Heat Pipe with Electrohydrodynamic Pumping T97-066
Steady-State Performance of a Rotating Miniature Heat Pipe T97-078
Thermocapillary Effects on the Wetting Characteristics of a Heated Curved Meniscus T97-079
Visualization Study of Flooding and Entrainment in a Closed Two-Phase Thermosyphon T97-087

Laser Interaction

Aerodynamic Trapping and Laser Heating for Containerless Glass Processing in Microgravity T97-014

Melting/Solidification

Aerodynamic Trapping and Laser Heating for Containerless Glass Processing in Microgravity T97-014
Characteristics of Ice Slurry Containing Antifreeze Protein for Ice Storage Applications T97-067

Mixed Convection

Mixed Convection in the Laminar Flow of Viscoelastic Liquids Through Rectangular Ducts T97-012
Laminar Pulsed Forced and Mixed Convection in a Vertical Isothermal Tube T97-062
Bubble Dynamics on a Heated Surface T97-070
Superheated Laminar Film Condensation on a Nonisothermal Horizontal Tube T97-080

Natural Convection

Heat Transfer Optimization Within Open-Ended Annular Cavities T97-016
Transient Natural Convection Between Vertical Finite Length Heated Plates T97-029
Magnetic Damping of Buoyant Convection During Semiconductor Crystal Growth with *g*-Jitters T97-030
Experimental and Approximate Analytical Modeling of Forced Convection from Isothermal Spheres T97-032
Double-Diffusive Convection in a Porous Trapezoidal Enclosure with Oblique Principal Axes T97-045
Magnetic Damping of Axisymmetric Thermocapillary Convection in Float Zones in Microgravity T97-090
Transient Natural Convection in a Cylindrical Annulus T97-093

Nonintrusive Diagnostics

Characterization of Plenum Spectra in an Arcjet Wind Tunnel T97-051
Line-of-Sight Temperature and Species Profiles Determined from Spectral Transmittances T97-055
Correlation Transfer: Index of Refraction and Anisotropy Effects T97-059

Radiation in Participating Media

Wideband Correlated-*k* Method Applied to Absorbing, Emitting, and Scattering Media T96-050
Radiative Heating in Scramjet Combustors T97-007
Convective and Radiative Coupling in a Burner-Supported Diffusion Flame T97-034
Analysis of Radiative Transfer in Cylindrical Enclosures Using the Finite Volume Method T97-035
Analysis of Discrete Ordinates Method with Even Parity Formulation T97-036
Green's Function to Determine Temperature Distribution in a Semitransparent Thermal Barrier Coating T97-047
Line-of-Sight Temperature and Species Profiles Determined from Spectral Transmittances T97-055
Correlation Transfer: Index of Refraction and Anisotropy Effects T97-059
Transient Radiation Transport in Participating Media Within a Rectangular Enclosure T97-060
Total Emissivities of Temperature-Fluctuating Molecular Gases T97-072
Temperature Distribution in a Composite of Opaque and Semitransparent Spectral Layers T97-081
Bounded, High-Resolution Differencing Schemes Applied to the Discrete Ordinates Method T97-082
Discrete Ordinates Algorithm for Domains with Embedded Boundaries T97-083
Inverse Radiation Problem in Two-Dimensional Rectangular Media T97-084
Diffusion Flames in Cylindrical Packed Beds T97-089

Radiation Interchange Between Surfaces

View Factor Between Inclined Rectangles T97-071
Discrete Ordinates Algorithm for Domains with Embedded Boundaries T97-083
View Factors for Rectangular Enclosures Using the Direct Discrete-Ordinates Method T97-092

Thermal Control

Thermal Contact Conductance of Composite Cylinders T97-009
Heat Transfer Optimization Within Open-Ended Annular Cavities T97-016
Review of Models for Thermal Contact Conductance of Metals T97-019
Experimental Thermal Contact Conductance of Electronic Modules T97-021
Quasi-Steady-State Performance of a Heat Pipe Subjected to Transient Acceleration Loadings T97-044
Infrared Imaging and Shock Visualization of Flow over Concave Blunt Bodies T97-056
Contamination Effects on the Geostationary Operational Environmental Satellite Instrument Thermal Control System T97-068
Steady-State Performance of a Rotating Miniature Heat Pipe T97-078

Thermal Modeling and Analysis

Wideband Correlated-*k* Method Applied to Absorbing, Emitting, and Scattering Media T96-050
Thermal Contact Conductance of Composite Cylinders T97-009
Analysis of Non-Fourier Conduction Waves from a Reciprocating Heat Source T97-010
Temperature Variation and Heat Transfer in Triangular Grooves with an Evaporating Film T97-011
Heat Transfer Optimization Within Open-Ended Annular Cavities T97-016
Thermal Property of a Two-Dimensional Partially Conducting Thin Screen T97-017
Review of Models for Thermal Contact Conductance of Metals T97-019
Thermal Contact Conductance of Adhesives for Microelectronic Systems T97-020
Experiments and Analyses of Flat Miniature Heat Pipes T97-023
Steady-State Heat Transfer Analysis of Arbitrarily Coiled Buried Pipes T97-026
Transient Natural Convection Between Vertical Finite Length Heated Plates T97-029
Experimental and Approximate Analytical Modeling of Forced Convection from Isothermal Spheres T97-032
Analysis of Radiative Transfer in Cylindrical Enclosures Using the Finite Volume Method T97-035
Modeling of the Electrogun Metal Vapor Plasma Discharge T97-053
Laminar Pulsed Forced and Mixed Convection in a Vertical Isothermal Tube T97-062
Total Emissivities of Temperature-Fluctuating Molecular Gases T97-072
Impact of Nucleation Density on Thermal Resistance near Diamond-Substrate Boundaries T97-077
Transient Natural Convection in a Cylindrical Annulus T97-093

Thermochemistry and Chemical Kinetics

Numerical Investigation of Vibrational Nonequilibrium Effects in Hydrogen–Oxygen Rocket Engines T97-002
Vibrationally Relaxing Flow of N_2 past an Infinite Cylinder T97-003

Existence of the Bottleneck in Vibrational Relaxation of Diatomic Molecules **T97-037**
Effect of H_2O Vapor on the Vibrational Relaxation in Hypersonic Wind Tunnels **T97-038**
Viscous Flow of Plasmas on Nonequilibrium Thermodynamic Diagrams **T97-040**
Evaluation of Real-Gas Phenomena in High-Enthalpy Aerothermal Test Facilities: A Review **T97-050**
Nonequilibrium and Differential Diffusion Effects in Turbulent Hydrogen Diffusion Flames **T97-057**
Assessment of Thermochemical Nonequilibrium and Slip Effects for Orbital Re-Entry Experiment **T97-085**
State-to-State Approach in the Kinetics of Air Components Under Re-Entry Conditions **T97-086**

Thermophysical Properties

Wideband Correlated-*k* Method Applied to Absorbing, Emitting, and Scattering Media **T96-050**
Optical Properties of Energetic Materials from Infrared Spectroscopy **T97-008**
Extension of Curve Fits for Enthalpy of Equilibrium Air to 1000 Atmospheres **T97-018**
Thermal Contact Conductance of Adhesives for Microelectronic Systems **T97-020**
Influence of Non-Boltzmann Distributions on the Thermodynamics Properties of Gaseous Species **T97-039**
Characteristics of Ice Slurry Containing Antifreeze Protein for Ice Storage Applications **T97-067**
Total Emissivities of Temperature-Fluctuating Molecular Gases **T97-072**
Measurement of Small Concentrations of Gas in a Low-Pressure Water Vapor Mixture **T97-088**
Diffusion Flames in Cylindrical Packed Beds **T97-089**

Chronological Index

T96-050 Wideband Correlated-*k* Method Applied to Absorbing, Emitting, and Scattering Media. Ovidiu Marin and Richard O. Buckius, *University of Illinois at Urbana–Champaign* (**10**, 2, p. 364) Article
Errata (**11**, 4, p. 598)

T96-091 Full Viscous Modeling in Generalized Coordinates of Heat Conducting Flows in Rotating Systems. Upender K. Kaul and Raymond P. Shreeve, *U.S. Naval Postgraduate School* (**10**, 4, p. 621) Article based on AIAA Paper 93-2579
Errata (**11**, 2, p. 320)

T97-001 Evaluation of Real-Gas Phenomena in High-Enthalpy Impulse Test Facilities: A Review. Chul Park, *Tohoku University, Japan* (**11**, 1, p. 10) Article based on AIAA Paper 96-2234

T97-002 Numerical Investigation of Vibrational Nonequilibrium Effects in Hydrogen–Oxygen Rocket Engines. Richard A. Jones, Leik N. Myrabo, and Henry T. Nagamatsu, *Rensselaer Polytechnic Institute* (**11**, 1, p. 19) Article based on AIAA Papers 95-2075 and 95-2076

T97-003 Vibrationally Relaxing Flow of N_2 past an Infinite Cylinder. D. Giordano, *European Space Agency, The Netherlands*; V. Bellucci, *Center for Advanced Studies, Research and Development in Sardinia, Italy*; G. Colonna, M. Capitelli, and I. Armenise, *University of Bari, Italy*; and C. Bruno, *University of Rome I, Italy* (**11**, 1, p. 27) Article based on AIAA Paper 95-2072

T97-004 Different Levels of Modeling for Diffusion Phenomena in Neutral and Ionized Mixtures. C. Desmeuzes, G. Duffa, and B. Dubroca, *CEA/CESTA, France* (**11**, 1, p. 36) Article

T97-005 Numerical Simulation of Supersonic, Chemically Reacting Flow Using an Implicit Finite Volume Method. Dieter Bohn, Harald Schönenborn, and Herbert Wilhelmi, *Aachen University of Technology, Germany* (**11**, 1, p. 45) Article based on AIAA Paper 96-0347

T97-006 Novel Approach for Calculating Equilibrium Radiating Flows. Frank J. Brauns and H. A. Hassan, *North Carolina State University* (**11**, 1, p. 52) Article based on AIAA Paper 96-1887

T97-007 Radiative Heating in Scramjet Combustors. H. F. Nelson, *University of Missouri–Rolla* (**11**, 1, p. 59) Article based on AIAA Paper 96-1843

T97-008 Optical Properties of Energetic Materials from Infrared Spectroscopy. R. A. Isbell and M. Q. Brewster, *University of Illinois at Urbana–Champaign* (**11**, 1, p. 65) Article

T97-009 Thermal Contact Conductance of Composite Cylinders. G. H. Ayers and L. S. Fletcher, *Texas A&M University*; and C. V. Madhusudana, *University of New South Wales, Australia* (**11**, 1, p. 72) Article based on AIAA Paper 96-0238

T97-010 Analysis of Non-Fourier Conduction Waves from a Reciprocating Heat Source. Gary D. Mandrusiak, *General Motors Corporation* (**11**, 1, p. 82) Article

T97-011 Temperature Variation and Heat Transfer in Triangular Grooves with an Evaporating Film. H. B. Ma and G. P. Peterson, *Texas A&M University* (**11**, 1, p. 90) Article

T97-012 Mixed Convection in the Laminar Flow of Viscoelastic Liquids Through Rectangular Ducts. Mônica F. Naccache and Paulo R. Souza Mendes, *Pontifícia Universidade Católica, Brazil* (**11**, 1, p. 98) Article

T97-013 Oscillatory Thermocapillary Flow in Cylindrical Columns of High Prandtl Number Fluids. J. Masud, Y. Kamotani, and S. Ostrach, *Case Western Reserve University* (**11**, 1, p. 105) Article

T97-014 Aerodynamic Trapping and Laser Heating for Containerless Glass Processing in Microgravity. François Babin, Paul-François Paradis, and Jean-Marie Gagné, *École Polytechnique de Montréal, Canada* (**11**, 1, p. 112) Article based on AIAA Paper 96-0924

T97-015 Laminar Film Condensation on a Thin Finite Thickness Plate. F. Méndez, G. Becerra, and C. Treviño, *Universidad Nacional Autonoma de Mexico* (**11**, 1, p. 119) Technical Note

T97-016 Heat Transfer Optimization Within Open-Ended Annular Cavities. C. P. Desai, K. Vafai, and M. P. Dyko, *Ohio State University* (**11**, 1, p. 121) Technical Note

T97-017 Thermal Property of a Two-Dimensional Partially Conducting Thin Screen. C. Y. Wang, *Michigan State University* (**11**, 1, p. 124) Technical Note

T97-018 Extension of Curve Fits for Enthalpy of Equilibrium Air to 1000 Atmospheres. Richard M. Fought, *University of Tennessee*; Roop N. Gupta, *NASA Langley Research Center*; and James E. Lyne, *University of Tennessee* (**11**, 1, p. 126) Technical Note

T97-019 Review of Models for Thermal Contact Conductance of Metals. M. A. Lambert, *San Jose State University*; and L. S. Fletcher, *Texas A&M University* (**11**, 2, p. 129) Article based on AIAA Paper 96-0239

T97-020 Thermal Contact Conductance of Adhesives for Microelectronic Systems. S. R. Mirmira, E. E. Marotta, and L. S. Fletcher, *Texas A&M University* (**11**, 2, p. 141) Article based on AIAA Paper 96-1826

T97-021 Experimental Thermal Contact Conductance of Electronic Modules. M. A. Lambert, *San Jose State University*; and I. G. Cavenall and L. S. Fletcher, *Texas A&M University* (**11**, 2, p. 146) Article based on AIAA Paper 96-1825

T97-022 Optimal Insulation of Structures with Varying Thermal Conductivity. Ahmet Z. Sahin, *King Fahd University of Petroleum and Minerals, Saudi Arabia* (**11**, 2, p. 153) Article

T97-023 Experiments and Analyses of Flat Miniature Heat Pipes. Y. Cao and M. Gao, *Florida International University*; and J. E. Beam and B. Donovan, *U.S. Air Force Wright Laboratory* (**11**, 2, p. 158) Article

T97-024 Modeling of Room-Temperature Heat Pipe Startup from the Frozen State. J. M. Ochterbeck, *Clemson University* (**11**, 2, p. 165) Article based on AIAA Paper 95-0419

T97-025 Coupled Thermal Analysis Method with Application to Metallic Thermal Protection Panels. Dean Kontinos, *NASA Ames Research Center* (**11**, 2, p. 173) Article

T97-026 Steady-State Heat Transfer Analysis of Arbitrarily Coiled Buried Pipes. Sudip Mukerji, Kaveh A. Tagavi, and William E. Murphy, *University of Kentucky* (**11**, 2, p. 182) Article

T97-027 Post-Critical Heat Flux Swirl Flow Heat Transfer with Two Refrigerants and Water. S.-J. Yoo, D. M. France, and T. M. Tarshish, *University of Illinois at Chicago* (**11**, 2, p. 189) Article

T97-028 Influence of Buoyancy on Convective Heat Transfer in Helicoidal Pipes. R. C. Xin and M. A. Ebadian, *Florida International University* (**11**, 2, p. 196) Article

T97-029 Transient Natural Convection Between Vertical Finite Length Heated Plates. Kuo-Ping Chang, *Ming-Hsin Institute of Technology and Commerce, Taiwan, ROC*; and Ying-Huei Hung, *National Tsing Hua University, Taiwan, ROC* (**11**, 2, p. 203) Article

T97-030 Magnetic Damping of Buoyant Convection During Semiconductor Crystal Growth with *g*-Jitters. Nancy Ma and John S. Walker, *University of Illinois at Urbana–Champaign* (**11**, 2, p. 212) Article based on AIAA Paper 96-0252

T97-031 Pool Boiling Curve in Microgravity. Ho Sung Lee and Herman Merte Jr., *University of Michigan*; and Francis Chiaramonte, *NASA Lewis Research Center* (**11**, 2, p. 216) Article based on AIAA Paper 96-0499

T97-032 Experimental and Approximate Analytical Modeling of Forced Convection from Isothermal Spheres. G. Refai Ahmed, *R—Theta Inc., Canada*; and M. M. Yovanovich and J. R. Culham, *University of Waterloo, Canada* (**11**, 2, p. 223) Article

T97-033 Rarefaction Effects in Small Particle Combustion. Robert Hiers, *Sverdrup Technology, Inc.* (**11**, 2, p. 232) Article based on AIAA Paper 96-1892

T97-034 Convective and Radiative Coupling in a Burner-Supported Diffusion Flame. O. A. Ezekoye and Z. Zhang, *University of Texas at Austin* (**11**, 2, p. 239) Article

T97-035 Analysis of Radiative Transfer in Cylindrical Enclosures Using the Finite Volume Method. Man Young Kim and Seung Wook Baek, *Korea Advanced Institute of Science and Technology* (**11**, 2, p. 246) Article

T97-036 Analysis of Discrete Ordinates Method with Even Parity Formulation. J. Liu, H. M. Shang, and Y. S. Chen, *Engineering Sciences, Inc.*; and T. S. Wang, *NASA Marshall Space Flight Center* (**11**, 2, p. 253) Article

T97-037 Existence of the Bottleneck in Vibrational Relaxation of Diatomic Molecules. Igor V. Adamovich and J. William Rich, *Ohio State University*; and Sergey O. Macheret, *Princeton University* (**11**, 2, p. 261) Article

T97-038 Effect of H_2O Vapor on the Vibrational Relaxation in Hypersonic Wind Tunnels. Véronique Joly and Claude Marmignon, *ONERA, France* (**11**, 2, p. 266) Article based on AIAA Paper 96-1855

T97-039 Influence of Non-Boltzmann Distributions on the Thermodynamics Properties of Gaseous Species. D. Giordano, *European Space Research and Technology Center, The Netherlands* (**11**, 2, p. 273) Article

T97-040 Viscous Flow of Plasmas on Nonequilibrium Thermodynamic Diagrams. Kuan Chen, *University of Utah*; and Thomas L. Eddy, *MeltTran, Inc.* (**11**, 2, p. 280) Article

T97-041 Effects of Flowfield Nonequilibrium on Convective Heat Transfer to a Blunt Body. Tahir Gökçen, *NASA Ames Research Center* (**11**, 2, p. 289) Article based on AIAA Paper 96-0352

T97-042 Comparison of Grid-Definition Schemes for Monte Carlo Simulations. Robert P. Nance, *North Carolina State University*; Richard G. Wilmoth, *NASA Langley Research Center*; and H. A. Hassan, *North Carolina State University* (**11**, 2, p. 296) Article based on AIAA Paper 96-0604

T97-043 Electromagnetic Attenuation in Plasmas Generated by Atmospheric Flight. Michael J. Nusca, *U.S. Army Research Laboratory* (**11**, 2, p. 304) Technical Note

T97-044 Quasi-Steady-State Performance of a Heat Pipe Subjected to Transient Acceleration Loadings. Scott K. Thomas, *Wright State University*; and Kirk L. Yerkes, *U.S. Air Force Wright Laboratory* (**11**, 2, p. 306) Technical Note

T97-045 Double-Diffusive Convection in a Porous Trapezoidal Enclosure with Oblique Principal Axes. Hoa D. Nguyen, Seungho Paik, and Rod W. Douglass, *Idaho National Engineering Laboratory* (**11**, 2, p. 309) Technical Note

T97-046 Hydromagnetic Free Convection Flow Over an Inclined Plate Caused by Solar Radiation. Ali J. Chamkha, *Kuwait University* (**11**, 2, p. 312) Technical Note

T97-047 Green's Function to Determine Temperature Distribution in a Semitransparent Thermal Barrier Coating. Robert Siegel, *NASA Lewis Research Center* (**11**, 2, p. 315) Technical Note

T97-048 Turbulent Flow and Heat Transfer in Rotating Different Aspect Ratio Channels. Sandip Dutta, *University of South Carolina*; and Malcolm J. Andrews and Je-Chin Han, *Texas A&M University* (**11**, 2, p. 318) Technical Note

T97-049 Survey of Blunt Body Flows Including Wakes at Hypersonic Low-Density Conditions. James N. Moss and Joseph M. Price, *NASA Langley Research Center* (**11**, 3, p. 321) Survey Paper based on AIAA Paper 96-1803

T97-050 Evaluation of Real-Gas Phenomena in High-Enthalpy Aerothermal Test Facilities: A Review. Chul Park, *Tohoku University, Japan* (**11**, 3, p. 330) Article based on AIAA Paper 96-2207

T97-051 Characterization of Plenum Spectra in an Arcjet Wind Tunnel. Mohammad A. Rob and Larry H. Mack Jr., *University of Houston—Clear Lake*; Sivaram Arepalli, *G. B. Tech, Inc.*; and Carl D. Scott, *NASA Johnson Space Center* (**11**, 3, p. 339) Article based on AIAA Paper 95-2126

T97-052 Modeling of Catalytic Reactions on Silica Surfaces with Consideration of Slip Effects. A. Daiß, H.-H. Frühauf, and E. W. Messerschmid, *University of Stuttgart, Germany* (**11**, 3, p. 346) Article

T97-053 Modeling of the Electrogun Metal Vapor Plasma Discharge. Laxminarayan L. Raja, Philip L. Varghese, and Dennis E. Wilson, *University of Texas at Austin* (**11**, 3, p. 353) Article based on AIAA Paper 96-2327

T97-054 Monitoring Magnetohydrodynamics Boundary Layers Using Emission Line Shape Features. Leslie E. Bauman and Lihong Zhong, *Mississippi State University* (**11**, 3, p. 361) Article based on AIAA Paper 95-1968

T97-055 Line-of-Sight Temperature and Species Profiles Determined from Spectral Transmittances. C. F. Mallery and S. T. Thynell, *Pennsylvania State University* (**11**, 3, p. 367) Article based on AIAA Paper 97-0120

T97-056 Infrared Imaging and Shock Visualization of Flow over Concave Blunt Bodies. K. B. Yüceil and D. S. Dolling, *University of Texas at Austin* (**11**, 3, p. 375) Article

T97-057 Nonequilibrium and Differential Diffusion Effects in Turbulent Hydrogen Diffusion Flames. J. P. H. Sanders and I. Gökalp, *Centre National de la Recherche Scientifique, France* (**11**, 3, p. 384) Article based on AIAA Paper 96-3033

T97-058 Numerical Simulation of Bhatnagar–Gross–Krook—

Burnett Equations for Hypersonic Flows. Ramesh Balakrishnan and Ramesh K. Agarwal, *Wichita State University* (**11**, 3, p. 391) Article based on AIAA Paper 96-0602

T97-059 Correlation Transfer: Index of Refraction and Anisotropy Effects. N. M. Reguigui, *Centre National des Sciences et Technologies Nucléaires, Tunisia*; and F. Dorri-Nowkoorani, U. Nobbmann, B. J. Ackerson, and R. L. Dougherty, *Oklahoma State University* (**11**, 3, p. 400) Article based on AIAA Paper 93-0141

T97-060 Transient Radiation Transport in Participating Media Within a Rectangular Enclosure. Kunal Mitra, Ming-Sing Lai, and Sunil Kumar, *Polytechnic University* (**11**, 3, p. 409) Article

T97-061 Natural Convection from Horizontal Circular and Square Toroids and Equivalent Cylinders. M. M. Yovanovich and J. R. Culham, *University of Waterloo, Canada*; and S. Lee, *Aavid Thermal Technologies, Inc.* (**11**, 3, p. 415) Article based on AIAA Paper 96-1838

T97-062 Laminar Pulsed Forced and Mixed Convection in a Vertical Isothermal Tube. T. A. Myrum, S. Acharya, and S. Inamdar, *Louisiana State University* (**11**, 3, p. 423) Article

T97-063 Turbulent Heat Transfer and Fluid Flow in a Porous-Baffled Channel. Jenn-Jiang Hwang, *Chung-Hua Polytechnic Institute, Taiwan, ROC* (**11**, 3, p. 429) Article

T97-064 Instability and Heat Transfer in Grooved Channel Flow. R. S. Iyer and S. Kakac, *University of Miami*; and K.-Y. Fung, *Hong Kong Polytechnic University* (**11**, 3, p. 437) Article

T97-065 Numerical Simulation of Secondary Flows in Channels Driven by Applied Lorentz Forces. Ferhat F. Hatay, Peter L. O'Sullivan, and Sedat Biringen, *University of Colorado*; and Promode R. Bandyopadhyay, *U.S. Naval Undersea Warfare Center* (**11**, 3, p. 446) Article

T97-066 Heat Transport Enhancement of Monogroove Heat Pipe with Electrohydrodynamic Pumping. J. E. Bryan and J. Seyed-Yagoobi, *Texas A&M University* (**11**, 3, p. 454) Article

T97-067 Characteristics of Ice Slurry Containing Antifreeze Protein for Ice Storage Applications. Svein Grandum, *University of Tsukuba, Japan*; Akira Yabe, Makoto Tanaka, and Fumio Takemura, *Mechanical Engineering Laboratory, Japan*; and Kazuya Nakagomi, *Toyama Medical and Pharmaceutical University, Japan* (**11**, 3, p. 461) Article

T97-068 Contamination Effects on the Geostationary Operational Environmental Satellite Instrument Thermal Control System. Philip T. Chen and Randy J. Hedgeland, *NASA Goddard Space Flight Center* (**11**, 3, p. 467) Article based on AIAA Paper 96-0241

T97-069 Symbolic Computation to Estimate Two-Sided Boundary Conditions in Two-Dimensional Conduction Problems. Ching-yu Yang, *National Kaohsiung Institute of Technology, Taiwan, ROC* (**11**, 3, p. 472) Article

T97-070 Bubble Dynamics on a Heated Surface. Nasser Rashidnia, *NASA Lewis Research Center* (**11**, 3, p. 477) Technical Note based on AIAA Paper 95-0880

T97-071 View Factor Between Inclined Rectangles. C. K. Krishnaprakas, *ISRO Satellite Centre, India* (**11**, 3, p. 480) Technical Note

T97-072 Total Emissivities of Temperature-Fluctuating Molecular Gases. Kouichi Kamiuto, *Oita University, Japan* (**11**, 3, p. 482) Technical Note

T97-073 Effect of Ribs with Holes on Heat Transfer in a Square Channel. S. C. Lau and R. B. Spence, *Texas A&M University*; and R. T. Kukreja, *Lynntech, Inc.* (**11**, 3, p. 484) Technical Note

T97-074 Heat Transfer and Friction in Segmental Turbine Blade Cooling Channels. R. B. Spence and S. C. Lau, *Texas A&M University* (**11**, 3, p. 486) Technical Note

T97-075 Heat Transfer and Flowfields in Short Microchannels Using Direct Simulation Monte Carlo. C. Mavriplis, J. C. Ahn, and R. Goulard, *George Washington University* (**11**, 4, p. 489) Article based on AIAA Paper 96-0361

T97-076 Computations of High-Speed, High Knudsen Number Microchannel Flows. C. K. Oh, E. S. Oran, and R. S. Sinkovits, *U.S. Naval Research Laboratory* (**11**, 4, p. 497) Article

T97-077 Impact of Nucleation Density on Thermal Resistance near Diamond-Substrate Boundaries. M. N. Touzelbaev and K. E. Goodson, *Stanford University* (**11**, 4, p. 506) Article

T97-078 Steady-State Performance of a Rotating Miniature Heat Pipe. Lanchao Lin, *Wright State University*; and Amir Faghri, *University of Connecticut* (**11**, 4, p. 513) Article

T97-079 Thermocapillary Effects on the Wetting Characteristics of a Heated Curved Meniscus. David M. Pratt, *U.S. Air Force Wright Laboratory*; and Kevin P. Hallinan, *University of Dayton* (**11**, 4, p. 519) Article

T97-080 Superheated Laminar Film Condensation on a Nonisothermal Horizontal Tube. Sheng-An Yang, *National Kaohsiung Institute of Technology, Taiwan, ROC* (**11**, 4, p. 526) Article

T97-081 Temperature Distribution in a Composite of Opaque and Semitransparent Spectral Layers. Robert Siegel, *NASA Lewis Research Center* (**11**, 4, p. 533) Article

T97-082 Bounded, High-Resolution Differencing Schemes Applied to the Discrete Ordinates Method. J. Patrick Jessee and Woodrow A. Fiveland, *Babcock & Wilcox* (**11**, 4, p. 540) Article

T97-083 Discrete Ordinates Algorithm for Domains with Embedded Boundaries. Louis H. Howell and Vincent E. Beckner, *Lawrence Berkeley Laboratory, University of California, Berkeley* (**11**, 4, p. 549) Article

T97-084 Inverse Radiation Problem in Two-Dimensional Rectangular Media. H. Y. Li, *Hua Fan University, Taiwan, ROC* (**11**, 4, p. 556) Article

T97-085 Assessment of Thermochemical Nonequilibrium and Slip Effects for Orbital Re-Entry Experiment. Roop N. Gupta, James N. Moss, and Joseph M. Price, *NASA Langley Research Center* (**11**, 4, p. 562) Article

T97-086 State-to-State Approach in the Kinetics of Air Components Under Re-Entry Conditions. M. Capitelli, I. Armenise, and C. Gorse, *University of Bari, Italy* (**11**, 4, p. 570) Article based on AIAA Paper 96-1985

T97-087 Visualization Study of Flooding and Entrainment in a Closed Two-Phase Thermosyphon. D. P. Shatto, J. A. Besly, and G. P. Peterson, *Texas A&M University* (**11**, 4, p. 579) Technical Note based on AIAA Paper 96-1832

T97-088 Measurement of Small Concentrations of Gas in a Low-Pressure Water Vapor Mixture. Timothy A. Ameel, *University of Utah*; Kwang J. Kim, *University of New Mexico*; and Byard D. Wood, *University of Nevada* (**11**, 4, p. 582) Technical Note

T97-089 Diffusion Flames in Cylindrical Packed Beds. K. Kamiuto and T. Ogawa, *Oita University, Japan* (**11**, 4, p. 585) Technical Note

T97-090 Magnetic Damping of Axisymmetric Thermocapillary Convection in Float Zones in Microgravity. Timothy E. Morthland and John S. Walker, *University of Illinois at Urbana–Champaign* (**11**, 4, p. 588) Technical Note

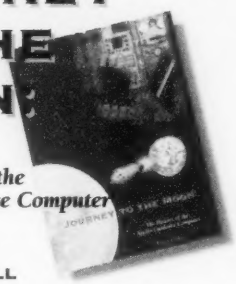
T97-091 Experimental Studies of Supersonic Film Cooling with Shock Wave Interaction (II). Takeshi Kanda and Fumiei Ono, *National Aerospace Laboratory, Japan* (**11**, 4, p. 590) Technical Note based on AIAA Paper 96-2663

T97-092 View Factors for Rectangular Enclosures Using the Direct Discrete-Ordinates Method. K. H. Byun, *Dongguk University, Korea*; and Theodore F. Smith, *University of Iowa* (**11**, 4, p. 593) Technical Note

T97-093 Transient Natural Convection in a Cylindrical Annulus. K. Ramamurthi and K. Ravi, *Liquid Propulsion Systems Centre, India* (**11**, 4, p. 595) Technical Note

JOURNEY TO THE MOON:

The History of the Apollo Guidance Computer



ELDON C. HALL

1996, 210 pp, illus,
Softcover
ISBN 1-56347-185-X
AIAA Members $29.95
List Price $54.95
Order # 85-X(945)

The first of its kind, *Journey to the Moon* details the history and design of the computer that enabled U.S. astronauts to land on the moon. Describing the evolution of the Apollo guidance computer, Mr. Hall contends that the development of the Apollo computer supported and motivated the semiconductor industry just as integrated circuits were emerging—just before the electronics revolution that gave birth to modern computers.

The book recalls the history of computer technology, both hardware and software, and the application of digital computing to missile guidance systems and manned spacecraft.

Contents:

History • Computer Hardware • Computers • MIT Instrumentation Laboratory • Apollo Hardware • Requirements • In the Beginning–Apollo Computer • Winds of Change Were Blowing • Block I Computers • System Integration • Naysayers and Advice from Outside Experts • Next Generation–Block II • Naysayers Revisited • Reliability Apollo Software • Software Development • Mission Software • Finale

CA and VA residents add applicable sales tax. For shipping and handling add $4.75 for 1–4 books (call for rates for higher quantities). All individual orders, including U.S., Canadian, and foreign, must be prepaid by personal or company check, traveler's check, international money order, or credit card (VISA, MasterCard, American Express, or Diners Club). All checks must be made payable to AIAA in U.S. dollars, drawn on a U.S. bank. Orders from libraries, corporations, government agencies, and university and college bookstores must be accompanied by an authorized purchase order. All other bookstore orders must be prepaid. Please allow 4 weeks for delivery. Prices are subject to change without notice. Returns in saleable condition will be accepted within 30 days. Sorry, we can not accept returns of case studies, conference proceedings, sale items, or software (unless defective). Non-U.S. residents are responsible for payment of any taxes required by their government.
